PROFESSIONAL SUMMARY

Motivated and detail-oriented DevOps Engineer with hands-on academic internship experience in DevOps practices, CI/CD workflows, cloud technologies, and software deployment processes. Skilled in Linux, Docker, GitHub Actions, AWS, and automation tools with a strong foundation in software development and system administration. Passionate about building scalable, reliable, and secure infrastructure while continuously learning modern DevOps technologies and best practices.

EDUCATION

Jahangirnagar University

B.Sc. in Information Technology CGPA: 3.82 / 4.00

Jan 2022 – Present

Up to 6th Semester

EXPERIENCE

Hubar Tech Limited

DevOps Intern (Academic Internship)

Oct 2025 – Dec 2025

Dhaka, Bangladesh

- Completed a 12-week academic internship, gaining practical exposure to DevOps workflows, Linux environments, Git, CI/CD concepts, cloud-based development practices, and software deployment processes while collaborating with the development team in a professional engineering environment.

ACHIEVEMENTS

- **Codeforces: Pupil** (Max rating: 1210) – [RH_Konok](#) 
- **LeetCode:** 250+ problems solved — Contest Rating: 1500+ – [RH_Konok](#) 
- **ICPC Dhaka Preliminary 2024 (ICPC Global):** Ranked **498th** out of 2400+ teams – Team *JU_OddOne* 
- **ICPC Dhaka Preliminary 2024 (BAPSOJ):** Ranked **515th** out of 2400+ teams – Team *JU_OddBits* 
- **IEEEExtreme 17.0:** Global Rank **1451**, Country Rank **10** – Team *JUBlackcaps* 
- **IEEEExtreme 16.0:** Global Rank **1488**, Country Rank **17** – Team *JU3Bits* 

PROJECTS

CI/CD Pipeline Deployment for Node.js Application on AWS

2025

AWS EC2, GitHub Actions, Node.js, NGINX, Linux, Let's Encrypt

- Designed and implemented an automated CI/CD pipeline using GitHub Actions to build a Node.js application and deploy the generated build files to an AWS EC2 Linux virtual machine under the `/var/www` directory, configured NGINX as a reverse proxy for application traffic, and secured the deployment with Let's Encrypt SSL certificates for HTTPS access.

Cloud Infrastructure Provisioning with Terraform Modules

2025

Azure, AKS, Terraform, Docker, Key Vault, Virtual Network

- Provisioned production-style Azure cloud infrastructure using reusable Terraform modules for AKS, virtual networking, compute resources, Key Vault, service principal integration, and application deployment components, improving infrastructure consistency, reusability, and maintainability.

Microservices Application Deployment with Kubernetes

2026

Kubernetes, Minikube, Helm, Docker, NGINX Ingress, Prometheus, Grafana, Virtual Machine

- Built and deployed a containerized microservices application on a local VM-based Minikube cluster, using Helm charts and Kubernetes manifests for workload management, NGINX Ingress Controller for gateway-style traffic routing, and Prometheus/Grafana for monitoring both deployed applications and VM resources.

CERTIFICATIONS

- **DevOps Internship – Hubar Tech Limited** 
- **ICPC Regional Contest 2023 Participant – Dhaka** 
- **ICPC Regional Contest 2024 Participant – Dhaka**
